

You: I need to use a specific LaTeX template for a report and I included a .bib file for the bibliography. I only copied the BibTeX file of all references, but the template doesn't show the references correctly. E.g., sometimes there is the title missing. How can I solve that?

ChatGPT: [Explains step-by-step how to check bibliography style, missing fields, recompilation, etc.]

You: Okay, when I use `\bibliographystyle{plain}`, the title is shown. But it doesn't show page numbers.

ChatGPT: [Explains why plain.bst doesn't show page numbers and suggests using other styles.]

You: For articles, the page number is shown but not for books...

ChatGPT: [Explains why BibTeX ignores pages for `@book`, and suggests using `@inbook`, `@incollection`, or custom .bst file.]
